Unity Developer with 3+ years of professional experience shipping mobile games and apps for iOS and Android. Independently built and delivered 25+ production titles across Casino, Hyper-Casual, and Casual genres, plus Unity-based wellness apps and cross-platform Flutter apps.

SKILLS:

Game Development: Unity (2D/3D, Mobile), C#, iOS, Android, Gameplay Systems, Live Games, Mobile Performance Optimization, Unity Profiler, Unreal (Basic), Godot (Basic)

Programming & Architecture: Dart, Flutter, REST API Integration, MVC, Observer Pattern, State Machines.

Live Services: Unity Gaming Services (Authentication, Cloud Save), Firebase, Google Play Games Services, AWS-backed APIs.

Tools & Exposure: Plastic SCM, GitHub, Cursor, Photoshop. AR (ARCore, Vuforia), Photon PUN2.

PROFESSIONAL EXPERIENCE:

Zapplogics Solutions LLP - Unity Developer (3+ Years of experience)

August 2023 - Present

- Independently built and shipped 25+ production games and apps for iOS and Android, owning each from implementation to release-ready build.
- Took over and extended a live Google Play title with 10K+ downloads, adding roughly 300 levels, a three-tier progressive difficulty system, Google Play Games sign-in with conflict-resolved cloud saves, and offline quest and daily-reward systems.
- Delivered casino games across table, slots, instant-win, and lottery formats, including Plinko, Slots, and Blackjack variants, built from shared modular C# systems.
- Built and released cross-platform mobile apps in Flutter and Dart, including two live on the App Store, plus Unity wellness apps backed by REST APIs and AWS services.

EDUCATION:

Master of Computer Applications (MCA) | 2024 - 2026 | CGPA: 7.74

ASM's Institute of Business Management and Research, Pune

Bachelor of Computer Applications (BCA) - Game Development | 2020 - 2023 | CGPA: 8.70

Tilak Maharashtra Vidyapeeth, Pune

PERSONAL PROJECTS: Showcased via <https://siddharthinamdar21.github.io>

Word EZ - Multiplayer word game in Unity with Photon PUN2: room-based matchmaking, scoring, and per-round word validation.

Big Dreams - 3D FPS prototype; programmed player movement and weapon systems within a four-member team.
